FOR ALL THE PURPOSES OF A

FAMILY PHYSIC.

THERE has long existed a public demand for an effective purgative pill which could be relied on as sure and perfectly safe in its operation. This has been prepared to meet that demand, and an extensive trial of its virtues has conclusively shown with what success it accomplishes the purpose designed. It is easy to make a physical pill, but not easy to make the best of all pills - one which should have none of the objections, but all the advantages, of every other. This has been attempted here, and with what success we would respectfully submit to the public decision. It has been unfortunate for patient hitherto that almost every purgative medicine is acrimonious and irritating to the bowels. This is not. Many of them produce so much griping pain and revulsion in the system as to more than counterbalance the good to be derived from them. These pills produce no irritation or pain, unless it arise from a previously existing obstruction or derangement in the bowels. Being purely vegetable, no harm can arise from their use in any quantity; but it is better that any medicine should be taken judiciously. Minute directions for their use in the several diseases to which they are applicable are given on the box. Among the complaints which have been speedily cured by them, we may mention Liver Complaint, in its various forms of Jaundice, Indigestion, Languor and Loss of Appetite, Listlessness, Irritability, Bilious Headache, Bilious Fever, Fever and Ague, Pain in the Side and Loins; for, in truth, all these are but the consequence of diseased action in the liver. As an aperient they afford prompt and sure relief in Cos tiveness, Piles, Colic, Dysentery, Humors, Scrof-ula and Scurvy, Colds with soreness of the body, Ulcers and impurity of the blood; in short, any and every case where a purgative is required. They have also produced some singularly sue essful cures in Rheumatism, Gout, Dropsy, Gravel Erysipelas, Palpitation of the Heart, Pains in the Back, Stomach, and Side. They should be freely taken in the spring of the year, to parify the blood and prepare the system for the change of seasons ccasional dose stimulates the stomach and bowels into healthy action, and restores the appe tite and vigor. They purify the blood, and, by their stimulant action on the circulatory system, reno vate the strength of the body, and restore the wasted or diseased energies of the whole organism. Hence an occasional dose is advantageous, even though no serious derangement exists; but unnecessary dosing should never be carried too far, as every purgative medicine reduces the strength, when taken to excess. The thousand cases in which a physic is required cannot be enumerated here, but they suggest themselves to the reason of every

body; and it is confidently believed this pill wil answer a better purpose than any thing which has hitherto been available to mankind. When their virtues are once known, the public will no longer doubt what remedy to employ when in need of a eathartic medicine. Being sugar-wrapped they are pleasant to take, and being purely vegetable, no aarm can arise from their use in any quantity.

For minute directions are wrapper on the Box. PREPARED BY JAMES C. AYER, Practical and Analytical Chemist, LOWELL, MASS.

Price 25 Cents per Box. Five Boxes for \$1.

CONSUMPTION. THIS remedy has won for itself such notoriety from its cures of every variety of pulmonary disease, that it is entirely unnecessary to recount the evi-dences of its virtues in any community where it has been employed. So wide is the field of its usefulness, and so numerous the cases of its cures, that almost every section of the country abounds in persons publicly known, who have been restored from alarming and even desperate diseases of the lungs by its use. When once tried its superiority over every other medicine of its kind is too appatent to escape observation, and where its virtues are known, the public no longer besitate what antidots to employ for the distressing and dangerous affections of the pulmonary organs which are incident to our climate. And not only in formidable at-tacks upon the lungs, but for the milder varieties of Colles, Couchs, Hoansenses, &c.; and for Children it is the pleasantest and safest medicine that can be obtained. As it has long been in constant use throughout this section, we need not do more than assure the

> GREAT SALE OF TOWN LOTS IN KENTUCKY CITY

ON MONDAY, OCTOBER 22d, 1855, a sale of Lots Jia KENTUCKY CITY will commence at public sutcry, and continue from day to day until all are disserted. The rapid growth and future permanent prospery of this place being the preminent object with the Prorictors, all the lots will be sold without reserve, and on the lost Liberal Terms, both as to time and manner of

This Town is located in the county of Hickman, State of Kentucky, upon the East bank of the Mississipp, river, 15 miles below the mouth of the Chio, and just below and adjoining the present town of Columbus, and has within its porate limits the Depot and Station Gr unds of the great bile and Ohio Railroad, at its Northern terminus. It would be out of place in this advertisement to dwell at length, and in detail, upon all the advan ages of this location, and the brillian's prospects of a city so fortunately situated, and being a terminal point of such a road upon such a river; but let the inquirer look at the prominent facts and reason for himself. Kentucky City has a high and healtly locality—protected from all inundations, by the nature of the grounds, the heighth of the river bank and the necessary embankment for the Railroad track, it is surrounded by a fertile and healthy country, rapidly settling. It front is washed by the mighty "Father of Waters," navigable from this point at all seasons. I the year for the argest class steamers, with a permanent and e dur-ing bank, and having conferselly one of the best and most secure harbors to be found from New Orleans to St. Louis.— Kennucky City is in direct connection with the Mobile and Ohlo Railroad, having its Depot within her limits. By ateumboat connection, which has been arranged, we will be in daily communicate n with the great Rainois Central Railroad at vairo, and also by a like connection with the Cairo and Fulton, or g eat California route, the road now fondly cherished by the three States of Mis-ouri, Arkaneas and Texas, as also the St. Louis and Iron Mountain Railroud, one branch of which is proposed to terminate on the West bank of the river opposite our town. The Mabile and this Railroad comes up to us from Alabam, passing through Mississippi and Western Tennessee, its cars feighted with the sugar, the cotton, the rice, and tropical fruits of the South, to return aden with the provisions and breadstuffs, and all the products and manufactures of the West and North brought down to us by the filing is Central and other Rail-roads, and by the Ohio and Mis is ppi rivers, with their numerous and lengthy tributaries. Kentuck, City being thus brought within twenty-four hours run of either, is about equal distance between the Southern Gulf entrance to the change of commedities, the legitima e trade and barter in the product of different climes must take place ere, here must they stop, here be stored, and here transhipped. It can require no ken of prophecy to foresee a brilliant, future for a city thus fortunately located and blest with a combina-tion of 10 many natural and artificial outlets for travel and
